CTC Poly-Bike-Bag

CTC offers this big (1.27m wide by 2.5m long), heavy-duty (125micron) polythene bag in order to provide a purpose-made bicycle transport bag that's big enough for a real touring bike, yet also light enough (0.8kg) and small enough when folded to carry on the bike! (It can also be posted ahead to point of departure.)

- Accepted by most airlines and several express coach operators. Check with CTC or your carrier for confirmation.
- Expect to replace this product after a period of regular use, depending on wear & tear of typical handling
- Protects the bike by letting baggage handlers see what they're doing, but accidents can still happen. **Add your own padding** (e.g. pipe lagging) if desired.
- The means of sealing up is your choice. **Parcel tape is not included.**

Price: £6.50 bag only, including UK postage from CTC Office. Overseas prices on application. May also be available more cheaply from the CTC's online shop.

To Order: send cheque, phone, fax or email with card details to one of the addresses or numbers given above, or visit www.ctcshop.org.uk.

For more information on preparing a bike for air travel, CTC members should obtain information sheet Inf14 and visit www.ctc.org.uk/DesktopDefault.aspx?TabID=5184.
